FONDÉES PAR ANGELO MOSSO
ET CONTINUÉES PAR VITTORIO ADUCCO

PUBLIÉES PAR GIUSEPPE MORUZZI

Professeur de Physiologie à l'Université de Pise

TOME 103

1965

PISA
UNIVERSITÀ DEGLI STUDI
1965

Rédaction: *Via S. Zeno, 31 - Pisa (Italie).*

Administration: « *Archives italiennes de Biologie* » - Università - Lungarno
A. Pacinotti, 43 - Pisa (Italie).

Imprimerie: « *E. Ariani* » e « *L'Arte della Stampa* » - Firenze (Italie).

TABLES DES MATIÈRES

FASCICULE 1, FEVRIER 1965

1. Modulation of the recurrent discharge of alpha motoneurons in decerebrate and spinal cats. M. M. GASSEL, P. L. MARCHIAFAVA and O. POMPEIANO	Pag. 1
2. An analysis of the supraspinal influences acting on motoneurons during sleep in the unrestrained cat. Modification of the recurrent discharge of the alpha motoneurons during sleep. M. M. GASSEL, P. L. MARCHIAFAVA and O. POMPEIANO	25
3. On the origin of the dark discharge of retinal ganglion cells. G. W. HUGHES and L. MAFFEI	45
4. Distribution of electrical responses to somatic stimuli in the diencephalon of the cat, with special reference to the hypothalamus. P. RUDOMIN, A. MALLIANI, M. BORLONE and A. ZANCHETTI	60
5. Microelectrode recording of slow wave and unit responses to afferent stimuli in the hypothalamus of the cat. P. RUDOMIN, A. MALLIANI and A. ZANCHETTI	90
6. Contribution of local activity and electric spread to somatically evoked potentials in different areas of the hypothalamus. A. MALLIANI, P. RUDOMIN and A. ZANCHETTI	119
7. Relationships between cerebral and mesodiencephalic nyctagmogenic centers in the rabbit. E. MANNI, G. B. AZZENA and M. L. ATZORI	136
8. Research on the structure and physiology of the eyes of a lycosid spider. III. Electroretinographic responses to polarized light. F. MAGNI, F. PAPI, H. E. SAVELY and P. TONGIORGI	146

9. Interval analysis of cell discharge in spontaneous and optically modulated activity in the visual system. J. M. FUSTER, A. HERZ and O. D. CREUTZFELDT . . .	Pag. 159
10. Behavior and reflexes of chronic thalamic cats. R. EMERS, R. W. M. CHUN and G. H. WANG	178
ANALYSES	194

FASCICULE 2, JUIN 1965

1. Arborisations dendritiques. Étude topographique et quantitative dans le noyau vestibulaire du chat H. MANNEN	Pag. 197
2. Recurrent cortical effects following stimulation of internal capsule. H. ASANUMA and V. B. BROOKS	220
3. Recurrent cortical effects following stimulation of medullary pyramid. V. B. BROOKS and H. ASANUMA. .	247
4. The response of reticular units to repetitive stimuli. M. E. SCHEIBEL and A. B. SCHEIBEL	279
5. Periodic sensory non responsiveness in reticular neurons. M. E. SCHEIBEL and A. B. SCHEIBEL	300
6. Suprapontine reticular control of intrinsic respiratory mechanisms. M. I. COHEN and A. HUGELIN	317
7. FERDINANDO MORIN	335
ANALYSES	338

FASCICULE 3, SEPTEMBRE 1965

1. An apparatus for eliciting and recording the Achilles' tendon reflex in unrestrained cats. L. NICOTRA and O. POMPEIANO	Pag. 341
2. Fusimotor function during sleep in unrestrained cats. An account of the modulation of the mechanically and electrically evoked monosynaptic reflexes. M. M. GASSEL and O. POMPEIANO	347
3. Activity of the red nucleus during deep desynchronized sleep in unrestrained cats. M. M. GASSEL, P. L. MARCHIAFAVA and O. POMPEIANO	369
4. Facilitation and inhibition in the visual system after photic stimulation. A. CAVAGGIONI and M. H. GOLDSTEIN Jr. .	397

5. Efferences corticifuges « non pyramidales » au niveau du pédoncule cérébral. C. BATINI et M. IMBERT . . .	Pag. 421
6. Action inhibitrice de certains noyaux thalamiques médians sur la mise en jeu réflexe du tractus pyramidal chez le chat. P. BUSER, H. ENCABO et M. LAMARCHE .	448
7. Étude électrophysiologique des différentes phases de sommeil chez le rat. A. SOULAIRAC, CL. GOTTESMANN et M. J. THANGAPREGASSAM	469
8. Julius Bernstein, Ludimar Hermann and the discovery of the overshoot of the axon spike. H. GRUNDFEST	483
ANALYSES	491

FASCICULE 4, DECEMBRE 1965

1. An analysis of the supraspinal influences acting on motoneurons during sleep in the unrestrained cat. Responses of the alpha motoneurons to direct electrical stimulation during sleep. A. R. MORRISON and O. POMPEIANO	Pag. 497
2. Central depolarization of group I <i>a</i> afferent fibers during desynchronized sleep. A. R. MORRISON and O. POMPEIANO	517
3. Pyramidal discharge from somatosensory cortex and cortical control of primary afferents during sleep. A. R. MORRISON and O. POMPEIANO	538
4. Vestibular influences during sleep. I. Abolition of the rapid eye movements of desynchronized sleep following vestibular lesions. O. POMPEIANO and A. R. MORRISON.	569
5. Influence of sleep and wakefulness on the response of lateral geniculate units to sinewave photic stimulation. L. MAFFEI, G. MORUZZI and G. RIZZOLATTI	596
6. Effect of synchronized sleep on the response of lateral geniculate units to flashes of light. L. MAFFEI and G. RIZZOLATTI	609
7. Callosal activity in unrestrained, unanesthetized cats. G. BERLUCCHI	623
8. Mechanisms of supraspinal actions upon spinal cord activities. Distribution of reticular and segmental inputs in cat's alpha-motoneurons. C. A. TERZUOLO, R. LLINÁS and K. THOMAS GREEN	635

9. Transmission of tonic activity through lateral geniculate body and visual cortex. A. ARDUINI and A. CAVAGGIONI	Pag. 652
10. Excitability of intra-geniculate optic tract fibres after reticular stimulation in the mid-pontine pretrigeminal cat. A. ANGEL, F. MAGNI and P. STRATA	668
11. Electroretinographic responses from the eyes of the wolf-spider <i>Lycosa tarentula</i> (Rossi). F. MAGNI and P. STRATA	694
12. Patterns of central neurons responses to suspected transmitters. G. C. SALMOIRAGHI and C. N. STEFANIS	705
13. Brain stem-limbic connections, and the electrographic aspects of deep sleep in the cat. G. CARLI, V. ARMENGOL and A. ZANCHETTI	725
14. A study of pontine lesions suppressing deep sleep in the cat. G. CARLI and A. ZANCHETTI	751
15. Blood pressure and heart rate during natural sleep of the cat and their regulation by carotid sinus and aortic reflexes. M. GUAZZI and A. ZANCHETTI	789
16. Induction of EEG desynchronized sleep by electrical stimulation of the neocortex. M. DI PAOLA, G. F. ROSSI and J. ZATTONI	818
17. Growth regulation of sympathetic nerve cells. R. LEVI-MONTALCINI	832
18. The thalamus. Data on its functional anatomy and on some aspects of thalamo-cortical integration. C. AJMONE MARSAN	847
ANALYSES	883
